Ref	What are the hazards?	Who might be harmed and how?	Max no of people at risk on one site	What are we already doing?	Likelihood	Severity	Risk Level	Any further measures to control this risk?
1	Coronavirus means severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) which causes the disease known as 'COVID-19'	All persons are at risk of being affected by Coronavirus in many ways:  In mild cases, the virus will cause high temperature and continual cough where in the main healthy people will recover.  In serious cases, the virus will attack the respiratory system forming mucus which severely obstructs the airways.  And in more serious cases, this can lead to inability to breath and in a high number of cases worldwide, this can and has unfortunately led to many fatalities.		A Coronavirus Working Group was formed immediately comprising Directors, Senior Management and other key personnel including the Human Resources Manager. The Working Group hold daily update meetings and communicate actions which are in line with current Government and NHS advice.  Prior to the working group being established, the Company had already put in place some vital steps such as sanitising units informing and instructing employees and alongside poster campaigns to heighten awareness in line with government and NHS guidelines  Staying COVID-19 Secure in 2020  We cordirm we have compiled with the goodenment's published on instruction of	2	5

## **Risk Rating Methodology**

		SEVERITY							
		Trivial	Minor	Moderate	Serious	Fatal			
	Remote	1	2	3	4	5			
LIKLIEIHOOD	Unlikely	2	4	6	8	10			
	Possible	3	6	9	12	15			
	Likely	4	8	12	16	20			
	Very Likely	5	10	15	20	25			

	Hazard Severity (A)		Likelihood of Occurrence (B)	Score
1	Trivial (eg discomfort, slight bruising, self-help recovery)	1	Remote (almost never)	
2	Minor (eg small cut, abrasion, basic first aid need)	2	Unlikely (occurs rarely)	
3	Moderate (eg strain, sprain, incapacitation > 3 days)	3	Possible (could occur, but uncommon)	A X B = Risk
4	Serious (eg fracture, hospitalisation >24 hours, incapacitation >4 weeks)	4	Likely (recurrent but not frequent)	
5	Fatal (single or multiple)	5	Very likely (occurs frequently)	

LOW RISK (1 – 8)	MEDIUM RISK (9 - 12)	HIGH RISK (15 - 25)
Continue but review periodically to ensure controls remain effective	Continue, but implement additional reasonably practicable controls where possible and monitor regularly	STOP THE ACTIVITY Identify new controls. Activity must not proceed until risks are reduced to a low or medium level
